

Chemist (m/f/d) for production and preparative work

About Cube Biotech

Cube Biotech is a biotechnology company located in Monheim, a town situated between Cologne and Düsseldorf. The company is a global service provider for the Pharmaceutical industry and a manufacturer of high-quality products for protein purification and stabilization. Customers of our products are University laboratories, R&D departments of the Pharmaceutical industry as well as biotechnology companies.

Our team at Cube Biotech currently consists of 26 people. We're looking for a chemist who is enthusiastic, motivated and looking to establish an important and rewarding career within a fast-growing company.

Responsibilities include:

- Management of complex projects for the development of new proprietary products
- Collaboration/project management for the production of functionalized polymers, e.g. Ni-NTA agarose and magnetic beads used for the purification and stabilization of (membrane) proteins
- Development of test procedures and specifications
- Method development in the field of synthesis and analytics
- Preparation of interpreted data and conclusions, in both oral or written format, to either internal teams or external partners, including possible next steps to drive projects forward
- Write and update company technical documentation including SOPs
- Perform literature searches to stay on top of cutting-edge technologies that are fit for purpose
- General laboratory duties including cleaning, calibration and maintenance of equipment

The ideal candidate should have the following:

- A Master's degree in Chemistry or related fields, PhD qualification highly advantageous
- Detailed understanding of organic chemistry, preferably with surface modification, particle generation and polymer chemistry experience
- Expertise in the use of practical synthetic chemistry techniques
- Knowledge (both theoretical and practical) of biophysical protein characterization would be beneficial
- Some understanding or a genuine interest, in molecular biology
- Experience of project management, team management and working as a team
- A very good standard of German and English
- Competent with Microsoft Word and Excel, as well as good computer skills

| **Cube will offer:**

- A two year, 40-hour week, contract with the possibility of being extended
- A modern, stimulating, and dynamic working environment
- Attractive opportunities for personal development
- Supportive culture and an opportunity to learn

We are curious about your application and look forward to receiving your complete documents. Please send your application to contact@cube-biotech.com.
